DR. WOODROW'S

Much Success with the Church-Resolutions Presented

Before the Mississippi and Alabam Synods which Declare for the Immediate Definition

In the judgment of this synod the widespread agitation of the subject of evolution occasioned by the new departure in the seminary at Columbia. S. S., cannot be allayed until the mind of the Church is accertained. Under this conviction the Synod of Mississippi deprecates the instruction of this theory as endangering the peace and unity of the Church and cannot consent that the hypothesis confersed by its advocates to be unverified, and which therefore cannot be dignified as science, should assume control or interpretation of the inspired word.

Recelutions Presentes Before the Alabama Sysco.

Tuscaloosa, Ala., October 31.—The committee of eight appointed by the Presbyterian Synod of Alabama to investigate the alleged teaching of evolution by Prof. Woodrow, of the Columbia, (S. C). Theological Seminary, submitted two reports, each signed by four members. The first report presents the following:

First—That the Bible as interpreted by our standards is to be regarded as the only infallible rule of faith and practice.

Second—That any teachings of science that are in conflict with God's word or dangerous in their tendency are condemned and should be avoided.

Third—That all teachings concerning the improved theory of evolution in the Theological Seminary at Columbia, except in a purely expository manner, showing what it is and how it affects revelation, whether in conflict with its records or not, and with no design of inculcating it as a truth, is hereby disapproved.

First—That this synod disapprove the doctrine of evolution, as taught by Prof. Perkins in his published address, becames such teachings are in conflict with the received interpretation of the Scripture, as expressed in the standards of the Presbyterian Church.

Second—That the Board of Directors of our Theological Seminary, at Columbia, be and are hereby instructed to take such steps as shall prevent such views being taught in that institution.

The reports were made a special order for to-morrow, when Dr. Woodrow is expected to be present. The reading of the resolutions created intense excitement and developed the fact that both sides have strong adherents,
